

Panel: Peering Tools & Best Practices

BKNIX Peering Forum 2017

VIE Hotel

Bangkok

15th – 16th May 2017

Peering Tools & Best Practices

- Discussion panel on experiences and good practices for peering at or around IXPs
- Moderator:
 - Philip Smith
- Panellists:
 - Che-Hoo Cheng (APNIC)
 - Martin Levy (Cloudflare)
 - Sokvantha Youk (TelcoTech)
 - Kittinan Sriprasert (BKNIX)
 - Johnathan Lee (TIME)

Agenda

- Short introduction from panel members
- Panel Session
 - Questions from Audience
 - Questions from Moderator

Question 1

- How do you decide who you would like to peer with and what tools do you use?

Question 2

- What location do you peer at:
 - Private cross-connect?
 - IXP?
 - Any others?

Question 3

- Now that you have decided who to approach and where, describe your experiences with trying to agree peering with other operators.

Question 4

- Any advice, what to do, what not to do?
 - For agreeing peering
 - For the physical interconnection
 - For BGP configuration

Question 5

- Do you make much use of tools such as PeeringDB? And if so, are they useful?
